QFT-Plus is an improved version of the market-leading IGRA, QuantiFERON-TB Gold. The test uses the same principle, test procedures, and reliable technology, but it is now optimized with innovative tuberculosis-specific antigens that elicit both CD8+ and CD4+ T-cell responses – enabling a more accurate assessment of cell-mediated immune response to TB infection.

#### **QFT-PLUS - WHEN ACCURACY MATTERS**

The innovative QFT-Plus technology provides additional clinical value, and robust and reliable results. With sensitivity of >95%, and the highest specificity of any TB test, QFT-Plus is the most accurate test for TB infection.

<b>Product</b>	<b>Cat. no.</b>
QuantiFERON-TB Gold Plus 2 Plate Kit ELISA	97051
QFT-Plus Blood Collection Tubes Single Patient Pack	97049
QFT-Plus Blood Collection Tubes (4x50)	97050
QuantiFERON Control Panel	91423
QuantiFERON CMV Tubes	78842
